

NIKOMAX NMC-315DR is designed for simultaneous sealing of several pairs of wires in the 110 type terminal blocks. The tool is a mechanical device designed for the mechanical xation of live wires in the terminals or cross-connect block connector.

The tool is equipped with removable and interchangeable nozzles with impact mechanism. On nozzles are knives for trimming excess lengths of wires after their xation pins. Inserting the knives can be set in the working position or removed with knives inside: easy to x cables, with trimming.

NMC-315DR is packed with 5 pairs intended for terminating multi-pair cables in the 110 type terminal blocks. To seal four pair is more convenient to use with NMC-TA15B nozzle (sold separately). This piece does not crashed into neighboring IDC contacts, help extending their lives, which is especially important for patch panels.

Ordering Table

P/N	Individual package		Collective package			Freight package		
	Dimensions, mm	Weight, kg	Quantity	Dimensions, mm	Weight, kg	Quantity	Dimensions, mm	Weight, kg
NMC-315DR	205x140x24	0.465	9 pcs.	300x205x150	4.25	36 pcs.	420x320x325	18.5
NMC-TA15B	35x25x25	0.052	30 pcs.	220x200x100	2.38	180 pcs.	405x235x240	10.5

Detailed characteristics

Characteristic	Value
Housing material	High-strength magnesium-aluminum alloy (AL 6061-T6)
Warranty	1 Year
Packaging	Individual - Blister pack
Color	Black
Temperature ranges	Storage from -20 to +70 ° C. Operation from -10 to +50 ° C
Additional features	Nozzle for simultaneous closing and trimming of 5 pairs in a set
Material of the handle cover	Non-slip thermoplastic (TPR)
Shock mechanism	Yes
