

NMC-CHLxx-BK-100

Self-adhesive base with retainer-latch for cable bundle

The basis with a clamp - a latch is intended for fixing a bunch of cables that considerably simplifies installation works. The base is fixed by gluing it on a flat surface with a self-adhesive part, and if there is a mounting hole with screws or self-tapping screws. The base of NIKOMAX is made of ABS plastic. Allows you to fix both a single cable and a bundle of cables of different diameters. The locking mechanism is suitable for multiple use. Thanks to the self-adhesive base, it allows mounting on any surface. Bases are black in color, 100 pieces per pack.
