

NMC-CHSxx-BK-100

Self-adhesive base cable holder with adjustable strap for the cable bundle, black

The base with an adjustable clasp is designed to fix a bundle of cables, which greatly simplifies installation work. The base is fixed by gluing it on a flat surface with a self-adhesive part, and if there is a mounting hole with screws or self-tapping screws. The base of NIKOMAX is made of ABS plastic. Allows you to fix both a single cable and a bundle of cables of different diameters. This base has an adjustable fastener, which is very convenient when fixing the cable bundles of different diameters. The design of a fastener is suitable for repeated use. Thanks to the self-adhesive base, it allows mounting on any surface. Bases are shipped in black, 100 pieces per pack.
