

## NMC-KJSD2-NT-MT

Tool-less, Shielded, Category 5e

NIKOMAX Toolless jacks («NT» series), do not require a special tool for termination. The inner insert provides convenient and high quality termination with anhanced crosstalk characteristics.

The jacks are fully compatible with all NIKOMAX components. Only 17 mm width and a standard height allows you to install them in any snap-in patch panels, including high density models with 0.5U height.

NMC-KJSD2-NT- MT (CAT.5e) are made in fully shielded, zinc-aluminum alloy housing. After install, a shielded cable will be safely clamped between the hinged lid and the module's built- in spring-loaded clip body. This design provides a constant and close contact with the screen, do not worsen over time.
