

NMC-KJUD2-NT-WT

Tool-less, Unshielded, category 5e

Keystone jacks are designed for installation in faceplates, surface mounting boxes and modular patch panels. Keystone jacks are widely used for connection workplaces to local network.

NMC-KJUD2-NT-WT (Cat.5e) keystone jacks are made from durable plastic in unshielded housing. IDC offer two wiring standards: T568A/B.

All modules are made in the same design and fully compatible with all NIKOMAX components. Only 17 mm width and a standard height allows you to install them in any snap-in patch panels, including high density models with 0.5U height. Jacks require a punchdown tool with 110/KRONE blades for termination.
