

NMC-RJBOOT65S-TR-100

Protective caps for RJ45 connectors, with latch protection, transparent, 100 pcs.

Protective cap (boot) is a simple and convenient way to protect the connector's attachment point on the cable. The design of the cap allows you to observe the correct bending radius of the cable, which greatly increases the service life of the connector.

NMC-RJBOOT65S-TR boots designed for shielded connectors (cat. 5e) and have a unique form factor that does not increase the size of the connector, which allows it to be used in any patch panels, including high-density ports. Functionally and visually, NIKOMAX caps are in no way inferior to factory filling caps. Cases made of high-quality plastic transparent color, perfectly combined with cables of any colors and shades. The caps are also provided with locking protection, which increases the usability.

Ordering Table

P/N	Diameter	Individual package			Freight package		
		Quantity	Volume, m3	Weight, kg	Quantity	Dimensions, mm	Weight, kg
NMC-RJBOOT65S6,5		100	0,000406	0,190	100 packs	490x370x280	12,5

Protective caps for RJ45 connectors, with latch protection, transparent, 100 pcs.

Detailed characteristics

Characteristic	Value
Temperature ranges	Storage from -40 to +70 ° C. Installation is from -10 to +50 ° C. Operation from -30 to +80 ° C
Warranty	1 year
Protection level	Transparent
Packaging	Polyethylene bag (100 pcs.)
Type of suitable connectors	RJ45
Diameter of the hole for the cable	6.5 mm
Material	Polyvinyl chloride (PVC)
Compatibility	Cat.5e STP
