

NMC-RP24UD2-HU-BK

Unshielded patch panel, 24 ports, 19 ", 0.5U, Category 5e

Patch Panels are designed for connecting different SCS subsystems and network equipment to each other with patch cords.

NIKOMAX NMC-RP24UE2-HU-BK (Cat.6) and NMC-RP24UD2-HU-BK (Cat. 5e), high-density panels with unshielded housings are intended for installation in 19" cabinets and racks. These panels contain 24 port RJ45 / 8P8C at a height of only 0.5 U. This solution is ideal when it is necessary to provide a high port density (e.g., data centers) or to extend the network in the limited space of the cabinet.

Universal IDC contacts for 110 / KRONE type knives are located on the rear side of panels. There are two wiring standards: T568 A and B. A built-in organizer for reliable cable fixing.
