Network Solutions

Unshielded Patch Panels are designed for connecting different SCS subsystems and network equipment to each other with patch cords. NIKOMAX unshielded patch panel are in black and are intended for installation in a 19'' cabinet or rack.

NIKOMAX **NMC-RP48UD2-1U-BK** (Cat.5e), high-density panels with unshielded housings are intended for installation in 19'' cabinets and racks. The panel contain 48 port RJ45/8P8C at a standatd height of 1U only. This solution is ideal when it is necessary to provide a high density port (e.g., data centers) or to extend the network in the limited space of the cabinet.

On the back of the patch panels there are 110 type contacts with color marking according to two standards: T568 A and B. The special design of the contacts allows the use of type knives for cable termination KRONE: For ease of administration, all ports are numbered, as well as additional marking pads, protective covers are included to protect cable connections and IDC contacts, and a removable organizer is provided for secure cable management.
