

NKL 4155C-IB – LSZH Jacket, Ice blue

NIKOLAN Cable U/UTP 4 pair, Cat.6A, Indoor, 23 AWG, Solid, 500 Mhz, 500 m

- Exceed the requirements of ISO / IEC 11801, EN 50173 and ANSI / TIA / EIA-568
- Certificates of TR TS, GOST-R and Fire Safety
- Reliable anti-interference due to unique cable structure

Four-pair Category 6A twisted pair cable is designed to use in high-speed data transmission systems at speed up to 10 Gbit/s.

NKL 4155C-IB Category 6A cable is made in unshielded U/UTP design, and designed for indoor installation. The jacket is made of LSZH compound, with low smoke and non-toxic compounds during combustion, ng (A) -HFLTx version. The feature of this cable is the ribbed inner part of the jacket, due to which it is possible to increase the distance between the conductors during group laying of the cable, reducing the interference. At the same time, the separator is also added, for greater insulation of conductors and less interference.

NIKOLAN 4 series cables will solve most of the problems associated with network construction, and excellent performance will provide seamless operation for the entire life of the cable. They are used to build a certified NIKOMAX SCS with a warranty period of up to 5 years. And they are delivered in "easy-pull box" cartons or on plywood drums.
