

Patch Panels

Cassette Patch Panel, 1U , for Copper and Optical cassette

Cassette Patch Panels are designed for connecting different SCS subsystems and network equipment to each other with patch cords.

NIKOMAX NMC-RP08-BLANK-CJ-1U-MT has a standard height of 1U and 8 slots (landing slots) under special cassette modules place (CJ Series). The cassette design is extremely easy to install and, if necessary, allows the flexibility to combine different types of cassettes and categories in a frame. This solution combines the versatility and flexibility of patch panels with traditional simplicity and speed of installation. In addition, a new panel allows you to fit the 48-port RJ45 / 8P8C within 1U.

There are 3 types of NIKOMAX copper cassettes for this panel: Shielded versions of Category 6 and 6A and unshielded version of Category 6. Also, the panel can be installed with optical cassette modules: one slot for 12 LC ports (up to 96 ports per panel) module or two slot for 12 SC ports (48 ports per panel).

The cassette patch panel is made of 1.5 mm steel and is suitable for both shielded and unshielded cassettes. For better shielding against electromagnetic interference and improve communication with unpainted rails cabinet, galvanized steel panels coated with nickel.

The manufacturer reserves the right to alter the appearance and characteristics of the product, without compromising the product's functionality

Specifications

	NMC-RP08-BLANK-CJ-1U-MT
Type	Shielded
Number of Slots	8
Type of module to be installed	NIKOMAX cassettes , CJ series
Marking	Labels (supplied with the panel)
Installation	19" Cabinet or rack
Height	1 U (44.5 mm)
Depth (with organizer)	27 / 115 mm
Housing Material	Nickel-plated steel, 1.5 mm
Color	Metallic (Nickel)
Temperature Ranges	Storage -40 to +70 ° C. Installation 0 to +50 ° C. Operating -10 to +60 ° C
Packaging	Cardboard box
Warranty	1 year

Ordering Table of Copper Cassette
