

NIKOMAX NMC-3640R and NMC-3640RB are designed for cable termination in patch panels, connectors and modules. The tools are compatible with the Twist-Lock type bayonet knives. Depending on the installed blade, they can be used for terminating contacts of 66/ 88/110 type or KRONE type equipment. NMC-3640RB comes with the NMC-14TA blade (66/88/110) included. Blades for the NMC-3640R are sold separately.

The impact mechanism will provide the required force for a secure fit and trimming of wires. And the adjustment of the impact force will allow you to choose the most comfortable of the two modes of operation.

On the handle of the tool contains a slotted flat-blade screwdriver, and to extract the hook from live contacts when removing wires. In the end part has a compartment for a spare blade.
